Logic Model 2B: IN•clued: Inclusive Healthcare – Youth & Providers Empowered

**Goal:** To decrease pregnancy, STD rates and HIV rates among LGBTQ youth ages 15-19

- **Inputs**
  - Planned Parenthood Teen Council Facilitator
  - Teen Council Peer Educators
  - Clinic Partners
  - LGBTQ Youth Center Partners
  - Training for all of the above
  - IN•cled Curriculum
  - Teen Council Program Model
  - Community partners to provide space, assistance with recruitment
  - # of LGBTQ youth participants
  - Voluntary texting service
  - Incentives & food
  - PPGNW support staff (trainer, manager)
  - Evaluation support staff

- **Activities**
  - Clinics receive a 3 hour training to be LGBTQ youth friendly and accessible
  - Teen Council peer educators are trained to deliver IN•cled clinic training and IN•cled LGBTQ training
  - Three hour IN•cled training for LGBTQ youth about sexual health, prevention and how to access health services
  - Voluntary texting service to remind LGBTQ youth to go to clinic
  - Website and e-learning modules for clinic staff to stay updated on LGBTQ health needs and how to be accessible

- **Outputs**
  - 22 clinics trained
  - 900 LGBTQ youth completed training
  - 900 LGBTQ youth who receive follow-up support via text and/or social media
  - 150 Health Center staff that receive follow up support via resource website and e-learning modules

- **Short Term Outcomes**
  - Increased use of LGBTQ friendly practices by providers
  - Increased self-efficacy of LGBTQ youth to communicate with sexual partner about protection and prevention
  - Increased knowledge of LGBTQ youth about safer sex practices
  - Increased knowledge of LGBTQ youth about how to access sexual health services
  - Increased self-efficacy to communicate sexual health needs and concerns to health care professionals

- **Intermediate Outcomes**
  - Increased reproductive healthcare use: making and completing a clinic appointment
  - Increased rate of HIV/STD testing
  - Increased use of contraceptives
  - Increased self-efficacy about sexual and reproductive health

- **Long Term Outcomes**
  - Decreased teen pregnancy rate among LGBTQ youth
  - Decreased HIV/STD rate among LGBTQ youth
