A Guide to Keep You Safe Abroad

Provided by Sexual Assault Support and Help for Americans Abroad (SASHAA)

Updated June 2017
Let’s be perfectly clear, the number one way to prevent sexual assault is to **not rape**. While the responsibility of ending sexual gender-based violence is on the perpetrators, this guide will offer general safety tips, country-specific information, and resources to help prevent and prepare travelers for the possibility of sexual assault abroad.

**GENERAL SAFETY TIPS:**

1. Use the **buddy system** and travel with friends!
2. Be aware of **social and cultural norms**. For example, looking at someone in the eyes when you speak to them is perfectly normal in the U.S., but in another country that could signify you’re interested in the person.
3. **Recognize controlling behavior** when entering a relationship. Most rape survivors recall feeling “uncomfortable” about some of their partner’s behaviors such as degrading jokes/language or refusal to accept “no” as an answer, whether in a sexual context or otherwise.²
4. **Avoid secluded places** where you could be more vulnerable. Meet new people in public spaces and let a trusted friend know where you’ll be beforehand.
5. **Trust your gut.** Many victims have a “bad feeling” right before an assault takes place.

**ALCOHOL AND DRUG AWARENESS:**

- Always watch your drink being poured and carry it yourself, even to the bathroom.
- “Drug-facilitated sexual assault drugs,” also referred to as club drugs or roofies may turn your drink slightly salty, bright blue, or cloudy. Effects such as distorted judgment, lost sense of time, sight, sound, identity, and consciousness can be felt within 15 minutes and may last up to 4 hours.³
- Japan’s legal drinking age is 20.⁴ Drinking is considered an important way to bond and connect with people, but remember to pace yourself according to your limits and take time to socialize.⁵

**CULTURAL INFORMATION:**

**Major Religions:** Shinto 83.9%, Buddhism 71.4%, Christianity 2%, Other 7.8% (Note: total is more than 100% because many people adhere to both Shinto and Buddhist beliefs.)⁵

**Legal System:** Japan has multiple courts, including district, summary, family, high, and supreme. One to three judges and layperson judges preside over each case.⁶

**Social/Cultural Norms:** In Japan, the family unit is of utmost importance, with elders receiving the most respect. Although the younger generations are becoming increasingly “westernized,” older generations might still adhere to strict traditions. The Japanese tend to be more formal in their interactions with other people than Americans are accustomed, and non-verbal communication—such as body language and posture—are extremely important.⁷

**Gender Equality:** A 2015 survey by the World Economic Forum ranked Japan 101st out of 142 countries in terms of gender equality. Compared to most countries, women in Japan have had very little female parliamentary and government representation.⁸
Sexual Assault and the Law: Japanese Context

The Japanese Penal Code defines rape as forced—through assault or intimidation—sex with a woman. By this definition, men cannot be raped and marital rape. However, “forcible indecency” is a crime that can happen to any sex or gender, and includes any forced sexual acts.9 Under both definitions, consent is not the difference between assault and sex; what makes an act rape or assault in Japanese law is violence or the threat of violence. Many women have tremendous difficulty bringing an assault to trial, and especially to conviction. In Japanese, there are two words for rape: tsūjō (common/usual) rape, a violent rape perpetrated by somebody who was not known to the victim and fushizen (unnatural/unusual) rape, in which the offender is already known to the victim in some way, and overt physical violence is often lacking.”10

If You Experience Sexual Assault...

Don’t blame yourself! Sexual assault is never the fault of the victim. You may be unsure of how to proceed, and that’s okay. First, consider taking the following actions:

1. If you are in a safe place, call someone you trust to be with you. If you are not safe, call someone you trust to come and get you.
2. Do self-collection of evidence. Put all of the clothes you were wearing, bed sheets, and so on in a paper bag. If you have any injuries, take pictures. If there is semen present, collect what you can in a hotel glass or cup and put it in the paper bag.
3. Call a SASHAA advocate internationally toll free, 24 hours a day, 7 days a week. They can help you through the ordeal, honoring your decisions. (See Resources)

Medical Care and Reporting Sexual Assault in Japan

Medical examinations include clinical and gynecological exams, as well as biological samplings. If possible, seeking medical attention before reporting to the police is preferable. Several women who have spoken out about their experience with reporting to the police have reported that interrogations take several hours, and a victim cannot leave even to get medical attention during the preliminary interviews. Some STI/STDs require time-sensitive treatment, and timely evidence collecting is crucial to a successful case.11 In the past, victims have experienced victim shaming and blaming when reporting to the police, as well as persuasion to not press charges.12
