

Renewable Energy Intern

- Purpose:** To coordinate, promote and support the proper use of the Renewable Energy Fee.
- Role:** Serve as a liaison in the Student Senate and report renewable energy initiatives to the Associate Students of Lewis & Clark; gain insight from student representatives.
- Duties:** Serve as the primary point of contact for students wishing to understand, pursue or engage in renewable energy initiatives.
- Assist students in developing proposals; develop an ongoing process for education and outreach.
- Publicize the events, projects, and activities of the Renewable Energy Fee Committee and clearly relay information to the community, as needed.
- Meet regularly with the Sustainability Director and serve as a liaison on the Sustainability Council, attending meetings when needed.
- Requirements:** Strong communications, writing, and organizational skills
- Solid understanding of renewable energy issues, markets (including renewable energy certificates), campus commitments and previous efforts.
- Must be available to work for Fall and Spring semester.
- Preferred Qualities:** Willingness to and affinity for interacting with multiple student groups.
- Understanding of existing sustainability-related and renewable energy programming; including existing clubs, committees, and existing and potential resources.
- High-level attention to detail, well-organized
- Compensation:** Receives the equivalent of Double Room rent for on-campus housing; must live on-campus all year.
- Reports to:** Sustainability Director
- Application:** Please see (online location)
