

- I. Start off with Andrew McFetters
 - A. Started this role in 2001, meet spouse through ASLC.
 - 1. Been at Lewis and Clark for 12 years.
 - B. The Health Fee
 - 1. We use to have a donor, but a new donor has not been found to fill that position.
 - a) What the Senate did to fix that makes all the senators, and the institution, truly great leaders.
 - 2. We want to make it protected and sustainable in the future.
 - a) We will be proposing a health fee for 37\$ a semester.
 - (1) What do our counterparts use?
 - (a) Linfield does not have a fee, but visits and lab work have a copayment.
 - (b) Reed also does not have a fee, but charge for lab work.
 - (c) UPS has a similar model to linfield, but the costs tend to be higher.
 - (i) Overseas cost is extremely high, so their peace corp students have a tough time.
 - (d) Whitman charges for shots, labwork, and physical exams.
 - C. Questions?
 - 1. Sherlock-
 - a) What is the staff difference for the higher costing schools?
 - (1) Unsure. I can get back to you on that.
 - 2. Jack- Is it mandatory?
 - a) Yes, without it being mandatory the cost would go up to cover the deficit.
 - 3. Naylor- Cost per visit? Could it be free for the first two then cost after?
 - a) We want students to be able to get what they need, offsetting the visits will not help those that really need it.
 - 4. Jack- Why is this being brought up now?
 - a) We wanted the students to know, and for us to know if there is significant and obvious pushback. We would then regroup and discuss our options.
 - (1) Violet-
 - (a) You can email me with any questions or concerns about the policy.
 - 5. Celest- Is it possible to mix the two, counseling can cost but physical and medical needs have a payment?

- a) Copay is not covered by financial aid, one top of which the problem of people being able to seek out the help when they need it is still there. We want to at least maintain what we have.
- 6. Jack- I like the copay idea, but what does 37\$ bring?
 - a) This maintains the status quo. It could raise in the future, but we want to stabilize the cost first, then see if there are donors or other methods to get to the cost rise. STI testing feels like a place we could start looking into.
- 7. Ben- Why is our fee so much cheaper than other schools?
 - a) Because there is already money going towards the program.
- 8. Max- What about wait times and that it isn't designed for ongoing care? I hear those problems a lot.
 - a) We just don't have the resources beyond what we can do. It is important for the college to be connected to Portland to help fix these issues. I am also conditioning the colleges I work with to accept and value student feedback more.

 - c) Tom- Funds come from student fee.
 - d) Naylor- How much money is available?
 - (1) William- 112K. But the number changes a lot. All tuition payments go to one account and it rolls over every year. The numbers last year were iffy.
 - (2) William- The money isn't to go to clubs and organizations. No examples of how to use it. The framework isn't there.
 - (3) Helen- Bill was rushed at the end of last year.
