

Goals Statement

2020 - 2021 Auditor, Payton Schurr

Auditor goals for the 2020-2021 school year.

- I. **Having more data from the student body to present to ASLC because data is impartial if collected correctly, data can lead to knowledge about oppressed groups in the Lewis & Clark community. This will help us create an effective student government that will help the Lewis & Clark students.**
 - A. **Having a survey go out to the student body every month about different issues going on in the student body that ASLC can help with.**

I was not able to have a survey go out every month, instead I decided on two surveys a semester that will still look for the same data that I was looking for.
 - B. **Creating surveys that are inclusive and equitable to every community at Lewis & Clark.**

I so far have made sure that my surveys are able to be taken by everyone. I make sure that everyone in the student body has a chance to participate.
 - C. **Making sure the surveys are anonymous for the student body to feel comfortable answering the questions.**

I have made all my surveys optional for providing an email. I had prizes available but made sure that the emails were taken off of the excel document and then randomized the responses, so I would not know who took the survey.
- II. **Maintaining and creating an easier way to find past documents to help keep ASLC transparent in all of our work and laws that are passed.**
 - A. **Over the summer I am going to be scanning documents and adding them to the auditor google drive.**

I was not able to do this because COVID did not allow me to go to the office.
 - B. **I will be going through google drive and trying to organize all the documents that are already there.**

I was able to create a completely organized google drive in order to make the auditor position effective.

- C. Once a month I will notify cabinet to send in documents that need to be recorded.**
I was not able to keep this up throughout the semester and am looking to find an easier way to do this.
 - D. Every Senate meeting will have minutes that will be posted for all of the Lewis & Clark community to see.**
I always had the senate minutes posted by the Saturday after Senate to make sure that were always transparent.
- III. Adapting the by laws of the ASLC position to better fit ASLC and the Lewis & Clark community to make sure that the position is continuing to be effective for the Lewis & Clark community.**
 - A. By the spring I want to get Cabinet's opinion on what they feel the auditor should be doing and adapt that into the bylaws.**
I have gotten more information about what the auditor position should be and will be working on changing the bylaws. Now with the Strategic Direction Task Force operating I can bring this up to them.
 - B. By March I want to have gone through all the by laws and adapted them to what the auditor position should be like.**
I cannot reflect on this because I am waiting until the spring semester to make changes. I have read through my bylaws and thinking about change.
 - C. Getting Cabinet's opinion about getting emails and passwords to obtain documents in the google drive**
I have not done this and plan to do this in the spring when I am motioning to make legislation changes.
