Unhealthy AQI levels; masks encouraged outdoors

10.18.2022

Outdoor air quality has reached unhealthy levels due to wildfires in Washington and eastern Oregon. To support a safe campus community, employees are encouraged to wear an N95 mask while working outdoors. Students are encouraged to wear a KN95 mask while outdoors and to minimize outdoor activities.

Employee N95 masks pick-up points:

- Facilities office
- Campus Safety building
- Campus Living office (until 4:00 p.m.)

Student KN95 masks pick-up points:

- Fields Dining Hall
- Campus Living office (until 4:00 p.m.)
- The bookstore (for purchase)

Current AQI levels can be found at <https://map.purpleair.com/> .

There is the potential for AQI levels to increase throughout the day. This is weather dependent and based largely on wind patterns. Additional information and guidance will be sent to employees and students should AQI levels reach 201 or higher.
