Date: **March 22, 2023**

(3/22/23) Full Restoration of Most Remaining IT Systems

Dear LC Community,

Great news! We're please to share that the following systems are now fully functional **for those who have changed their LC password:**

- **Moodle** is no longer in read-only mode. It is fully available for creating, updating, and deleting content.
- **WebAdvisor and Self Service** are available. For CAS, the revised schedule for advising and registering for fall semester is as follows; more information will be shared shortly:
 - Advising period: April 3–21
 - Registration: April 24–27
- **LC network drives** (also known as LC Files, H: drive, J: drive, etc.) are no longer in read-only mode.
- **Colleague** and **Informer** are fully available to authorized users.
- **Nelnet**, which is used for remitting tuition payments to the college, is available.
- **EMS** (the Event Management System) is fully available.

Although employee network printing remains mostly unavailable on the CAS and Graduate School campuses, printing *is* available at the Watzek Library Computer Lab and at the Graduate School in York 118 and 110. We are working to have additional printing options available after spring break.

Printing by students is available at all locations where printing was available to students prior to the incident.

Thank you to the IT team for these significant achievements!

Sincerely,
The Executive Council
